

## GIANT SEA ROVER RESEMBLES CIGAR!

This picture shows how the German super-submarine, the Deutschland, afloat on the surface of the water, resembles a huge cigar.

As in the case of other vessels, the greater part of the submersible is under water. Only about 15 feet of the structure of the boat extends above the water line.

The big engines that drive the boat are about in the middle of the vessel, at the rear. When the boat is in motion on top of the water the observers in the conning tower are the only members of the crew above the water level.
